MAJOR PROJECT

Environment monitoring system

Mar 2023 — May 2023

An environment monitoring system is a technological solution designed to measure, analyze, and track various environmental parameters for the purpose of ensuring the well-being of the surroundings. This system typically focuses on monitoring three key aspects: noise levels, air quality, dust and water quality system.

EXPERIENCE

Front-End developer

Frantic Infotech Noida U.P

August 2023 — Present

Utilized React.js to create dynamic, responsive, and user-friendly web interfaces.

kismatproperty.com

Developed a comprehensive real estate listing and management span for the company's website, enabling users to search, view, and manage real estate properties with ease

<https://geekoz.vercel.app/>

Developed and maintained a comprehensive tour and travel website, enhancing user engagement through customized travel packages and immersive content

<https://electronics-virid.vercel.app/>
